Project Description

U.S. Embassy in Moscow is happy to support NASA Space Apps Challenge 2018 in Moscow!

In preparation for Moscow's NASA Space Apps 2018, we need your help with:

- Creating and updating content for Moscow page on NASA's web-portal
- Creating blog posts, press releases and social media content
- Designing promotional materials and souvenirs for participants (t-shirts, stickers, posters, etc.)
- Communicating with the Space Apps Global Organizing Team

Desired Skills Interests

Additional Information

Space Apps - a 48-hour-long hackathon, traditionally happening each year in April - is initiated by NASA and implemented by its worldwide partners. The event takes place simultaneously in over 190 cities around the world, and therefore requires a lot of local and global coordination. U.S. Embassy in Moscow is organizing Space Apps Moscow edition.

Last year, Moscow event had record-breaking numbers of 170 participants - designers, engineers, programmers, and entrepreneurs - and 20 submitted projects. The hackathon invited participants to provide real-life solutions to global challenges such as alternative energy use and natural disaster response.
